Pee Dee Explorer

About Pee Dee Explorer

What does it mean when someone says they are from the "Pee Dee" of South Carolina? A place is bigger than its physical geography. A "sense of place" weaves together our experiences with the land, its culture and lifestyle.

[Pee Dee Explorer](#) features over six hours of video vignettes that characterize the natural, cultural, and agricultural landscapes of the Pee Dee region of South Carolina. The Pee Dee Explorer website is divided into chapters that provide various contexts for telling the story of the region. Each chapter contains a collection of video stories and accompanying text, based on well-known and "off the beaten path" landmarks found in the Pee Dee.
