

a natural state

Artist: Janet Orselli

Video 5: Tryon Installation Project, Part E: Pelvic Rocker

This one called Pelvic Rocker and it's a pelvis from a cow and some other part of a cow here and it's just a fun piece. Some of the pieces I think of as being quite humorous. Some are more serious. But all of them relate in some way to nature, to natural materials and man-made materials that are usually old materials.
