

# a natural state

**Artist: Janet Orselli**

**Video 4: Sumter Installation Project, Part A: Sanctuary**

I had once bought for an installation budget wise and it was any easy choice to use Janet because I knew that she used eggs and nests and bird elements in her work

(Scenes of Janet unloading her van in preparation of her opening)

(Scene of Janet admiring the gallery space)

I love this installation and what I like about Janet's work so often is that she can really create a very balanced almost soothing space you look at this space and its soothing there is a high comfort level despite the fact that she uses familiar objects in a very unfamiliar way you know and she gives them all a twist and yet the way she puts it together creates a very balanced and soothing space hence the title Sanctuary it is a sanctuary you walk around here and there is something very right about this space and something very comforting about it effectively make it spark her stuff is soothing comfortable and it sparks all at the same time and I think that is a tremendous accomplishment I mean that's not any easy thing to do and she usually pulls that off and that is why I asked her to do this and you see the result
