Video 7: Bentwood Trellis – B. Side Pieces

The next thing you want to do is to select, select the wings you want to go on your trellis, the wings that you want to grow your flowers on, so you kind of select smaller pieces, and you do the same thing, you kind of clean them off, and kind of trim them up so that they will look real pretty. Trim the ends. So, when you doing the trellis, you always do two pieces, so you want both sides to look the same, so you do twin pieces, as I would call it. And what you do... is willow is really flexible, so what you do is, you to get the curve, you kind of roll it around. See. It is real flexible, so you kind of roll it around to get a sort of butterfly wing. So you do two of those, one for each side.
